

DON IGNATIUS CYRIAC

Senior Front End Developer | Bangalore

cyriacignatius@gmail.com | +91-8281461021 | linkedin.com/in/don-ignatius-cyriac

EXPERIENCE SUMMARY

Senior Front End Developer (FE2) with 5+ years of experience in designing and building responsive web applications in fintech and healthcare. Proficient with CSS and JS frameworks with extensive experience of UI/UX and user psychology. Notable achievements include boosting the conversion rate of an existing website by 80% with improved code and design.

KEY SKILLS

- Tools and Technology – React | Next.js | HTML | CSS | JavaScript | TypeScript | Jest | Webpack | JIRA | Mixpanel | Countly | Pullstate | React Query
- Interpersonal Skills – Leadership | Time Management | Strategic Planning | Excellent Communication
- Language Skills – English | Malayalam | Hindi | Tamil
- Other Skills – Decision Making | Project Management | Stakeholder Management

PROFESSIONAL EXPERIENCE

Front End Developer, Qure.ai, Bangalore *Mar 2026–Present*

Responsibilities

- Developed and maintained a React/Next.js healthcare platform for radiology workflow management
- Contributed to features across patient management, DICOM viewing, AI-assisted reporting, and real-time collaboration
- Worked on frontend architecture including state management (Pullstate, React Query)
- Implemented analytics instrumentation using Mixpanel and Countly

Front End Developer (FE2), Clear (Cleartax), Bangalore *Aug 2021–Mar 2026*

Responsibilities

- Work closely with product managers and stakeholders to understand feature requirements and objectives
- Collaborate with designers, optimize applications, develop features, and maintain brand consistency for user-facing interfaces
- Utilize FE libraries like React to develop modular, reusable code components to streamline development and maintenance
- Write clean, efficient code to implement features and functionalities based on project requirements
- Develop, test, and deploy features, ensuring adherence to project timelines and quality standards
- Troubleshoot and debug front-end issues using browser developer tools and debugging techniques
- Identify and address performance bottlenecks such as render-blocking resources, large asset sizes, and inefficient code
- Collaborate with back-end developers to troubleshoot integration issues and ensure seamless functionality
- Implement performance optimization techniques like image compression, lazy loading, and server-side rendering
- Proficiency in HTML5, CSS3, and JavaScript to create dynamic and interactive web experiences
- Implement SEO best practices such as semantic HTML markup, meta tags, and structured data
- Monitor and analyze website performance metrics using tools like Lighthouse or Google PageSpeed Insights

Assistant System Engineer, TCS, Kochi *Mar 2017–Jul 2018*

Responsibilities

- Creating end to end user guide and support documents of the product for the BFSI clients
- Work with clients to set up the process for automatic web certificate renewal

PROJECTS

TestBuddy (Clear Hackathon v3 – Special Mention – 10k)

- Built Electron JS app for semi-technical roles like product and testing team members
- No code, one-time setup app which handles auth, modularization and storage of generated test cases

Community (Clear Hackathon v2)

- Comments and replies section to increase engagement on any content
- Plug and play model where content and community section are independent

ACADEMIC PROFILE

M.Tech (CS) – Indian Institute of Technology, Kanpur | 2019–21 | Incomplete

B.Tech (CS) – Rajiv Gandhi Institute of Technology (RIT), Mahatma Gandhi University | 2012–16 | CGPA: 6.88

ACHIEVEMENTS

- Clear Hackathon Special Mention for presenting solution to reduce time in integrated testing – 2024
- Spot Award for taking initiative and good ownership in making engineering process easier – 2023
- Spartan Award for overachieving targets as a team – 2023
- Hall of Fame for delivering good results year on year as a team – 2023
